Subject: National Drug Code Compliance

To Whom this May Concern,

R&R Lotion manufactures personal care products such as Sunscreen, Hand Sanitizer, Antibacterial Hand Cleaners and Itch and Pain Relief products. These products are regulated under The Food and Drug Administration as a non-prescription drug product or OTC. Over-the-counter medicine, also known as OTC, refers to medicine that you can buy without a prescription. They are safe and effective when you follow the directions on the label and as directed by your health care professional. In 1972, the FDA established the OTC Drug Review to evaluate the safety and effectiveness of hundreds of thousands of OTC drug products. An OTC monograph is a "rule book" of conditions for each therapeutic category that describes the active ingredients, uses (indications), doses, route of administration, labeling, and testing for an OTC drug to be considered generally recognized as safe and effective. OTC monograph drugs that meet these OTC monograph requirements and other applicable drug requirements do not need FDA review and approval before being marketed to consumers. R&R Lotion follows several of these monographs to formulate and develop its formulas in its FDA registered facility.

All of R&R Lotion's OTC formulas can be found on the FDA's National Drug Code Directory. The FDA uses a NDC number to identify and report all drugs in the marketplace using a unique, three-segment number. FDA publishes the listed NDC numbers in the NDC Directory which is updated daily and can be found at the website below. All of our NDC numbers can also be found on the label of the bottle.

<https://www.accessdata.fda.gov/scripts/cder/ndc/index.cfm>

1. Under Select Type select "NDC Code"
2. In the search bar under near type in our NDC Company Identifier "59555" and click search.

Best Regards,
