Subject: RoHS Compliance

To Whom this May Concern,

RoHS stands for Restriction of Hazardous Substances. RoHS, also known as Directive 2002/95/EC, originated in the European Union and restricts the use of specific hazardous materials found in electrical and electronic products (known as EEE). All applicable products in the EU market after **July 1, 2006**, must pass RoHS compliance. The substances banned under RoHS are lead (Pb), mercury (Hg), cadmium (Cd), hexavalent chromium (CrVI), polybrominated biphenyls (PBB), polybrominated diphenyl ethers (PBDE), and four different phthalates (DEHP, BBP, BBP, DIBP.) RoHS 2, or the Recast RoHS 2 Directive 2011/65/EU, was published in July 2011 by the European Commission. The scope of the original RoHS was expanded to cover all electrical/electronic equipment, cables, and spare parts with compliance required by July 22, 2019 or sooner depending on product category. RoHS 3, or Directive 2015/863, adds four additional restricted substances (phthalates) to the original list of six, as cited under REACH legislation. It also adds Category 11 products. RoHS3 takes effect 22 Jul 2019.

As of this letter none of R&R Lotion's formulations contain any of the ingredients that are on the RoHS list. In Section 15 of all of our Safety Data Sheets we have regulatory information including RoHS information. We will continue to monitor the RoHS regulations for any new chemicals and compare any newly listed chemicals with the raw materials in our finished products and communicate this information to our customers.

Best Regards,
