I.C. INSECT REPELLENT SPRAY

PRODUCT DESCRIPTION

I.C. Insect Repellent is designed as the safer and more effective alternative to DEET and Picaridin. It employs a non-toxic mode of interference between people and biting insects by rendering the host invisible, instead of using a neurotoxin. Its all-natural active ingredient, IR3535, is an odorless and lightweight extract that's non-tacky and breaks down once it has completed its use. Leaving no need to wash off.

DIRECTIONS FOR USE:

Apply liberally to face and body and rub until absorbed.

USES:

- Use prior to work to prevent from being bit by insects

APPLICATIONS:

Outdoor Workers, Utilities, Power Gen, Telecommunications, Municipalities, Arborists, Construction, Military

QUALITY ASSURANCE

Facility Standards - R&R Lotion facilities follow Current Good Manufacturing Practice (cGMP) and/or Cosmetic GMP requirements.

Material Standards - Incoming raw materials must undergo quality inspection and are efficacy tested prior to being used for manufacturing.

Equipment Standards - All equipment and tools utilized are cleaned and sanitized both before and after use once verified by QA using sterility testing equipment.

Formula Testing - Formulas developed by R&R Lotion undergo a series of tests and approvals to verify stability, product efficacy, and preservative effectiveness.

Finished Product Testing - Every batch produced by R&R Lotion must go through physical, chemical, and microbiological testing prior to being approved for distribution. This includes in-house lab testing of appearance, color, odor, density, pH, and viscosity, followed by third-party active ingredient efficacy and product sterility testing.

Product Traceability - The collection and annual review of all raw materials, finished goods, process controls, and formulas allows for consistent control and correction in good manufacturing and documentation procedures.
