

POISON IVY & OAK SCRUB · COSMETIC

I.C.® IVY CLEANSE

Post-contact formula · With micro scrubbers · Helps remove poison ivy, oak & sumac urushiol oil

PRODUCT DESCRIPTION

I.C. Ivy Cleanse is a gentle skin cleanser formulated to help remove poison ivy, poison oak and poison sumac urushiol oils. Specifically designed for outdoor professionals, it targets and removes the urushiol oil right after contact with these plants. A blend of micro scrubbers and premium surfactants lifts the oil from the skin and rinses it away, while skin conditioners help prevent drying.

DIRECTIONS FOR USE

- Wet affected area with water.
- Apply generously to exposed area.
- Gently rub in product for at least 15 seconds.
- Rinse with water and pat dry with towel. Repeat as needed.

USES

- Assists in the removal of poisonous plant oils (urushiol) that cause rashes
- Use after contact with poison ivy, oak or sumac

APPLICATIONS

Outdoor Workers, Municipalities, Utilities, Power Gen, Telecommunications, Arborists, Construction, Military.

FEATURES & BENEFITS

POST-CONTACT CLEANSE	Helps remove urushiol oil right after contact with poison ivy, oak and sumac
MICRO SCRUBBERS	Effective micro-scrubbing formula helps strip urushiol oil from the skin

QUALITY ASSURANCE

Facility standards. R&R Lotion facilities follow Current Good Manufacturing Practice (cGMP) and/or Cosmetic GMP requirements.

Material standards. Incoming raw materials must undergo quality inspection and are efficacy tested prior to being used for manufacturing.

Equipment standards. All equipment and tools utilized are cleaned and sanitized both before and after use once verified by QA using sterility testing equipment.

Formula testing. Formulas developed by R&R Lotion undergo a series of tests and approvals to verify stability, product efficacy and preservative effectiveness.

Finished product testing. Every batch produced by R&R Lotion must go through physical, chemical and microbiological testing prior to being approved for distribution. This includes in-house lab testing of appearance, color, odor, density, pH and viscosity, followed by third-party active ingredient efficacy and product sterility testing.

Product traceability. The collection and annual review of all raw materials, finished goods, process controls and formulas allows for consistent control and correction in good manufacturing and documentation procedures.
